Music Term 3 - Week 2

Grade 3 & 4

SOUND!

Damian.OBree@hestalbanssth.catholic.edu.au

This term, we are going to learn about different types of sounds and how to make music using those different types of sound!

This week, *you will be doing activities that ask you to find different objects to make different sounds. We are going to be musical scientists and experiment with sound!*

1. *Find 8* ***different*** *materials around the house. (plastic, metal… whatever you like)*

2. *Play some rhythm patterns using the different materials. Have someone else at home play a different rhythm pattern at the same time using a different material to yours.*

3. Watch this video. How many objects did he use? Make a list of them. There are LOTS!

https://www.youtube.com/watch?v=Svg_fIoHij8

4. *Tell me about the sound of each of your materials. Is it rough? smooth? sharp? soft? hard? You tell me a word for each one in the next column. You can choose your own word. Colour in the one that you thought was the best.****(Print out and write on this sheet or write it on another piece of paper)***
