Design Technology - Technological Devices

The purpose of designing, inventing and creating new technology devices is often to make an everyday task easier and simpler for the user. They often replace devices relying on older technologies.

Name 5 technological devices that have been invented that make life easier:

1. _____

2. _____

3. _____

4. _____

5. _____

Put these 5 inventions into the table below. Describe their main function and how they make life easier for their user.

Device	Function	How does it make life easier?
