## PREP

**Learning Intentions:** This week we are learning how to make trees using a scrunched-up aluminum foil and paint to give visual effects. See if you can create a scene with trees and you on a swing.

If you don't have green paint, see if you can use food dye, but need to wear gloves. Use only very little dye.

If you don't have aluminum foil, use scrunched up newspaper or a brush, dipped in the green colour and just dab and lift quickly, to get the rough look or texture of the tree.

**Watch this video to get some ideas:**
